

Turn your cell phone into a
forensic camera with

PH  rensicCAM™

Add a GlowTorchFN forensic
light for a complete forensic
imaging system 

PH  rensicCAM™+

PH^orensicCAM™

Each PhorensicCam comes with the following:

- * a custom cellphone adaptor to fit all common cellphones
- * a custom camera filter and lens holder with your choice of clear (UV), yellow, orange or red high quality glass camera filter. They are interchangeable, so you can get one or all four for use with your forensic light source
- * an adjustable cellphone holder so it can be attached to a hand grip or to a tripod.
- * a hand grip for improved stability
- * Hotshoe allows for our GlowTorchFN™ light to be attached to convert your PhorensicCam to a PhorensicCam+
- * Carry case
- * Don't have a cellphone? We can supply refurbished cellphones which cost less, as you are only using it as a camera and storage device. We recommend a device that shoots in RAW format as well as JPEG, and that has micro-SD storage capabilities for archiving purposes

PH^orensicCAM™+

Convert your PhorensicCAM to a PhorensicCAM+ by adding one or more of our GlowTorchFN™ forensic light sources. These waterproof, rugged LED light sources are compact, and come with two rechargeable Li-Ion batteries, a battery charger, an adaptor to attach the GlowTorchFN to the hotshoe, and one pair of appropriate nylon framed goggles.

GlowTorchFN lights are available in White, 365nm (UV), 415nm, 470nm, 505nm, 530nm and 570nm wavelengths.

Complete PhorensicCam+ Kit showing all of the components, including an additional magnification lens to be available in the near future.

PhorensicCam+ attached to a tripod using the hand grip on the left, and using an optional pistol-grip with ball head for fine adjustment on the right.
